

# RESUME

## PERSONAL DATA

Name: Lalith Nag, Sharan Gururaj  
Mobile: +49 176 35881991  
E-Mail: [lalith.sharan@ovgu.de](mailto:lalith.sharan@ovgu.de)  
Date, Place-of-Birth: 27.02.1993, Chennai (India)  
Links: [Website](#), [LinkedIn](#), [GitHub](#)

I'm a medical systems engineer focused on advancing healthcare through technology such as deep learning and computer vision for interventions & surgeries.

## EDUCATION

Apr 2017 to present      **Master's Degree, M.Sc. in Medical Systems Engineering**  
Otto von Guericke University, Magdeburg (Germany)  
Specialisation: Deep Learning, Computer Vision,  
Computer-assisted Surgeries & Interventions  
Current grade: 1.6/4 (Max.: 1.0, Min. passing: 4.0)

Jul 2010 to May 2014      **Bachelor's Degree, B.E. in Biomedical Engineering**  
Manipal Institute of Technology, Karnataka (India)  
Specialisation: Pattern Recognition, Medical Image and Signal  
Processing  
Grade: 8.69/10 (Max.: 10.0, Min. passing: 5.0)

Jun 2008 to May 2010      **All India Senior Secondary School Certificate**  
Central Board of Secondary Education, Chennai (India)  
Specialisation: Computer Science, Mathematics, Physics,  
Chemistry  
Grade: 89.6% (Max.: 100%, Min. passing: 33%)

## PROJECTS

Apr 2018 to Jul 2018      **Landmark Detection in Echocardiography**  
Automatic segmentation of mitral valve in 3D with CNN using U-Net architecture, with Keras on TensorFlow backend & Python.

Oct 2017 to Jun 2018      **Depth-mapping for Stereoendoscopy**  
Stereo-reconstruction using computer vision techniques from surgical data, implemented using OpenCV libraries on C++.

## PROFESSIONAL EXPERIENCE

- Oct 2018 to present      **Intern**  
Cognition Guided Surgery, Heidelberg (Germany)  
Actively tackling the design of a knowledge-based guidance system for mitral valve reconstruction surgeries, with computer vision & deep learning – stereo vision in particular.
- Jan 2018 to Sep 2018      **Student Research Assistant**  
Otto Von Guericke Universität, Magdeburg (Germany)  
Support of research in the *Computer Assisted Surgeries* group; multi-modal registration of MRI & US data, medical visualisation using MeVisLab + python scripting, 3D slicer.
- Nov 2014 to Mar 2017      **Manager-Strategy**  
eHelium Advisory Service Private Limited, Chennai (India)  
Market analysis, identifying gaps & opportunities in building a scalable online education platform for entry-level talent pool in Indian service sector.
- Jan 2014 to May 2014      **Trainee**  
Institute of Nuclear Medicine & Allied Sciences, Delhi (India)  
Bachelor thesis on *Cognitive State Assessment using EEG Signals*. Developed a classifier to assess cognitive-state using 14-channel EEG signals in a war-like multi-tasking scenario.
- May 2013 to Aug 2013      **Intern, Innovation Think Tank**  
Siemens Healthineers, Goa (India)  
Identified pain areas and worked on respective solutions for Siemens Diagnostic product line for the Indian market, as part of a pan-Indian, multi-disciplinary team of 10 engineers.

## SKILLS

- Programming:      C++, OpenCV, MATLAB, Python (Tensorflow & PyTorch)
- Software:      MeVis Lab, 3D Slicer, ParaView, MS Office
- Languages:      **English:** Proficient in Speaking, Writing (C2)  
                      **Deutsch:** Good in Speaking, Writing (B2)  
                      **Tamil:** Native proficiency

Heidleberg, 05.12.2018
